ABOUT ME

A dedicated Software Engineering with a background in high-pressure management and logistics. Transitioning from a successful career as an Assistant Manager in hospitality to technical roles, bringing strong problem-solving, leadership, and multilingual communication skills. Currently seeking opportunities to apply my programming and analytical skills in a professional environment.

EXPERIENCE

Tesco Distribution Center, Southampton - *Warehouse Operative*

05/2024 - 04/2026

As an Operative, my role involves sorting items for different stores and coordinating dispatch logistics to ensure 100% accuracy in unit delivery. Entrusted as a Quality Champion to audit outgoing shipments against strict compliance standards.

MedBar&Kitchen, Southampton - *Assistant Manager*

10/2019 - 09/2023

As Assistant Manager, I directed daily operations for a high-volume late-night venue and full-service kitchen, focusing on team leadership and financial performance. I maintained rigorous financial oversight by managing daily cash-ups, reconciling high-volume payments, and monitoring labor costs to maximize profitability. Additionally, I spearheaded staff training and performance management to ensure high service standards and safety compliance, while streamlining kitchen and floor workflows to enhance guest satisfaction and successfully execute large-scale events.

EDUCATION

Solent University, Southampton - *Software Engineering*

09/2022 - 04/2026

Key Modules: Object-Oriented Programming, Web Development, Data Structures, Machine Learning, App Development.

Languages: Kotlin, Python, C++, HTML/CSS, JavaScript, TypeScript.

Collaborative Projects: Participated in hackathons and group-based software builds, focusing on Agile methodologies and version control.
